

American Standard Silver Series™ SI Air Conditioners

Dependable comfort. Uncompromised performance.

Inside, it's perfectly comfortable.

American Standard Heating & Air Conditioning is proud to introduce the newest member of our family. The American Standard Silver Series™ SI air conditioner. Based around American Standard's Duration™ coil with Advanced Heat Exchanger technology, the Silver Series SI delivers our legendary durability and performance in a smaller, lighter size.

But while it may be smaller, make no mistake, it's still big on quality. While industry standards dictate testing a coil to 250,000 cycles, the Duration™ coil in the Silver Series SI is tested to over 3 million cycles, six times more than the average coil experiences in its lifetime. The Silver Series SI has also proven its durability in the American Standard Systems Environmental Extreme Testing (SEET) Lab, where it survived 16 weeks of brutal temperature extremes.

As added assurance, the Duration coil technology in the Silver Series SI is based on technology already used in the automotive industry for more than 20 years, with a proven track record of durability.

HEATING & AIR CONDITIONING

The comfort and performance you expect from American Standard Heating & Air Conditioning.

The Silver Series™ SI is built by American Standard Heating & Air Conditioning, which means it's built well. In fact, every component of the Silver Series SI has been carefully designed to contribute to performance and efficiency.

- Inside every Silver Series SI you'll find the legendary Duration™ compressor, known throughout the industry for its dependability. It's the same compressor you'll find at the heart of our top of the line equipment.
- The Duration™ coil is built from all aluminum to help it resist environmental corrosion and the bimetallic corrosion found in copper-and-aluminum coils.
- A sturdy coil guard protects the coil and other components from debris and physical damage.
- Manual Charge Assist™ helps ensure the proper refrigerant charge, providing ideal performance and efficiency.
- The Silver Series SI uses a smaller refrigerant charge that reduces its carbon footprint and system stress.

Reliability for years to come.

The Silver Series SI has been built to last using premium materials and engineering, so you'll enjoy plenty of cool, comfortable summers.

For added peace of mind, it's backed by a straightforward warranty that offers 10 years of protection on the Duration compressor, 10 years on the Duration coil and 5 years on all other parts with product registration.*

*Registered Limited Warranty terms are available when you register within 60 days of installation. You can register online at americanstandardair.com or by phone at 800-554-8005, otherwise American Standard Heating & Air Conditioning's Base Limited Warranty terms will apply. Base Limited Warranty information on specific products can be found on americanstandardair.com.

Our dealers will put you in your comfort zone.

Your local, independent American Standard Heating & Air Conditioning dealer can install your Silver Series SI with unmatched skill and expertise. Your dealer also has a complete line of American Standard Heating & Air Conditioning products to build a complete home comfort system around your Silver Series SI. From energy recovery units to efficient multi-stage furnaces to the unbeatable whole-home air filtration of an AccuClean™ unit, your ideal home environment is closer than you think.

More than 100 years of feeling right at home.

American Standard Heating & Air Conditioning has been a trusted expert in home comfort for more than a century. We were the first to introduce safe, affordable home heating, and we continue that tradition today with systems that are built to last, and built to perform. The Silver Series SI is the latest in our long history of quality and innovation.
